

Casper Boat Club Newsletter October 2014

Well our 2014 boating season has come to an end. It was another great year at the club! The club made some great improvements this year. The kitchen was enlarged to make room for a new cooler, freezer, and more dry storage. A new icemaker was purchased. New computer, software and electronic photo display in hallway. The bathrooms were updated with new vanities, toilets and paint. The helipad was painted white with a red "H." The AED was installed and the staff trained on it. New beds and bedding were purchased for the staff at the trailer. On the Web site there is a new buy/sell feature and link so contacts go directly to the Board. Two new sewer pumps and floats were replaced. The camping rules and policies were posted at campsites. A metal baffle was welded below Courtesy Dock to abate waves. There is a new dock for gassing jet skis. There was a Certified Electrical inspection of docks. After the huge storm, the trees were trimmed by a professional and then more were trimmed by the board and club members. Recycling was begun. Improvements were made to the jet ski slips. A gas line was installed to the patio fire pit. A new leaf sweeper was put on the Gater.

I would like to thank Sheryl and all her staff for the awesome job they did this year. I am looking forward to her and her staff returning next year.

Our plans are to winterize the club around the middle of October. I would like to remind you that the gate will be locked as of November 1st. If for any reason you need to get onto the property over the winter please feel free to contact a board member.

Winter Storage

If you wish to store your boat on the grounds this winter, please contact Karen at 237-9823. The fee for winter storage is \$170.00. The tentative date for locking the gate is November 1st. Any watercraft left at the club after that date will be charged the winter storage fee.

Sincerely,

John Hatcher, Commodore
